

**SCHEDULE D: SERVICE DEFINITION FOR ENHANCED OPERATIONAL MANAGEMENT LEVEL – USER OS & APPLICATION MANAGED**

The User OS & Application Managed Enhanced Operational Management Level provides the operational management detailed in this Schedule D for virtual workstation environments on Hyper-V and VMware hypervisors, as well as physical workstation environments and user devices. This Enhanced Operational Management Level provides a fully maintained Operating System and application environment, based on systems listed on the Functional Capability section below, and configured by the Service Desk to the Partner's requirements plus user support for use thereof by covered users ("Users").

- The User OS & Application Managed Enhanced Operational Management Level provides the following components:
- Installation of the OS and application managed environment based on Exponential-e's standard OS build specification, for the OS and application configurations listed in the Functional Capability section of this Schedule D.
- Decommissioning of the OS managed environment based on Exponential-e's standard ITIL compliant OS and application decommissioning process.
- Installation and configuration of the required software needed to support Exponential-e's service delivery of the OS and applications (including AV, backup, monitoring software, and the setup of VM tools where applicable).
- Configuration and management of the OS and application environment, including any OS and application options, features, or supported applications installed onto the OS.
- Provisioning of the OS and applications licenses, where purchased by the Partner through Exponential-e
- Exponential-e's standard AV solution installed and configured for the OS and application workloads, and managed as set out in this Schedule D.
- Continuous (24x7x365) OS and application monitoring and alerting.
- Backup management of the OS and application environment, including configuring daily backups, monitoring the backups daily, picking up backup faults, and remediating them for OS and application issues to Exponential-e's standards detailed in this Schedule D.
- Carry out full system and file level restores from backup for the OS and application environment as requested by the Partner.
- Automated analysis and resolution of incidents raised for configured OS and application alarms and warnings.
- Manual analysis and resolution of incidents raised for OS and application alarms and warnings that cannot be automatically resolved.
- Manual changes raised for OS and application changes recommended by Exponential-e.
- Delivery of approved changes raised by Exponential-e and the Partner.
- Patch Management of OS and application patches in line with Exponential-e's standard, ITIL compliant patching process as set out in this Service Document.
- Exponential-e administration and user account management.

The User OS & Application Managed Enhanced Operational Management Level does not provide the following components:

Management of Google G Suite, Microsoft Office 365 or Microsoft 365 cloud components.

**Functional Capability**

Exponential-e manages and supports the User equipment OS to Exponential-e's standard build specification for the vendor's products under Mainstream Support, as detailed in the following location and amended from time to time: <https://www.exponential-e.com/operating-systems-support>.

## Operation

The User OS & Application Managed Enhanced Operational Management Level components are as follows. Exponential-e's responsibilities with respect to the User OS & Application Managed Enhanced Operational Management Level are described within the following table. The Partner is responsible for all management activities not included within Exponential-e's responsibilities below.

| Aspect                  | Exponential-e's Responsibilities  |
|-------------------------|---|
| Anti-virus ("AV") Agent | <ul style="list-style-type: none"> <li>• Set up and manage AV configuration settings including recommended vendor exclusions for the OS and applications.</li> <li>• Identify new AV signature updates and approve these updates to be made to agents automatically on an hourly schedule.</li> <li>• Monitor and manage AV signature downloads and AV application.</li> <li>• Identify eligible AV product and agent software (including upgrades) that apply to compute resources (if any) that form part of the Supported Item.</li> <li>• Notify the Partner of eligible AV product and agent upgrades via new change ticket, and the time when these upgrades will be carried out.</li> <li>• Carry out product and agent upgrades at the time agreed by the Partner.</li> <li>• Install and configure agent software on new compute resources (if any) that form part of the Supported Item.</li> <li>• Monitor and notify the Partner of any detected virus infections.</li> <li>• Remove virus infections from compute resources (if any) that form part of the Supported Item once detected and where possible.</li> <li>• Produce and maintain a document in the CMDB detailing the Exponential-e AV process and the processes the Partner must follow to report new virus infections, request AV version updates, request AV product changes etc.</li> </ul> |
| Application Management  | <ul style="list-style-type: none"> <li>• Conduct routine maintenance and management of application environments against compute resources (if any) that form part of the Supported Item.</li> <li>• Implement maintenance procedures.</li> <li>• Investigate application outages.</li> <li>• Investigate application performance issues.</li> <li>• Work with the Partner or 3rd parties to resolve application problems or outages.</li> <li>• Investigate and address root causes for outages and application performance issues.</li> <li>• Provide the Partner with regular updates on resolution efforts.</li> <li>• Ensure that proper systems or management changes are put into place based on recommendations from application vendors.</li> </ul>   |
| Asset Management        | <ul style="list-style-type: none"> <li>• Management of OS and application licenses, including arranging Partner/End User renewals and keeping up to date OS and application license records.</li> <li>• Maintain a valid software library for OS and application software owned or leased by the Partner / End User as provided by the Partner.</li> <li>• Maintain a valid software library for OS and application software provided by Exponential-e to the Partner.</li> <li>• Retain hardware information for compute resources (if any) that form part of the Supported Item in the CMDB regarding their specification, warranty and configuration.</li> <li>• Maintain a full and up to date asset management register for compute resources (if any) that form part of the Supported Item is available to the Partner in the CMDB.</li> </ul>  |

| Aspect                                    | Exponential-e's Responsibilities   |
|---|--|
| Backup (if enabled for Workstations)      | <ul style="list-style-type: none"> <li>• Configuring daily backups of all compute resources (if any) that form part of Workstation Supported Items to include the ability to restore individual files as well as whole Operating System environments and the data it contains.</li> <li>• Monitoring backups daily.</li> <li>• Test application specific backups and restores during the On Boarding activity to prove the recoverability of backed up data.</li> <li>• Use reasonable endeavours to detect backup faults and remediate them for OS and application issues.</li> <li>• Carry out full system restores from backup as requested by the Partner. Each compute resources (if any) that form part of Workstation Supported Items includes one full system restore event per annum without additional charge. Additional full system restores can be completed at additional charge.</li> <li>• Carry out OS and application file level restores from backup as requested by the Partner. Each compute resources (if any) that form part of Workstation Supported Items includes sixty (60) file system restore events per annum without additional charge. Additional file level restores can be completed at additional charge.</li> <li>• Produce and maintain a document in the CMDB detailing the backup settings used to back up compute resources (if any) that form part of Workstation Supported Items, and the processes the Partner must follow to back up and restore Supported Item data.</li> </ul>                               |
| Certificate Management                    | <ul style="list-style-type: none"> <li>• Manage certificate renewals for OS and application functionality with Partner approved providers for compute resources (if any) that form part of the Supported Item on behalf of the Partner.</li> <li>• Keep up to date certificate records available in the CMDB.</li> <li>• Link OS and application level certificates to the OS for compute resources (if any) that form part of the Supported Item.</li> <li>• Manage bespoke certificate provider authorisation licenses on compute resources (if any) that form part of the Supported Item.</li> </ul>  |
| Disaster Recovery and Business Continuity | <ul style="list-style-type: none"> <li>• Provide the Partner with a standard format Disaster Recovery and Business Continuity document for the compute resources (if any) that form part of the Supported Item.</li> <li>• Request sign off from the Partner stakeholders for the standard format Disaster Recovery and Business Continuity document for the compute resources (if any) that form part of the Supported Item.</li> <li>• Participate in isolated DR exercises for the Supported Items once a year (to support DR failover exercises delivered remotely on a sample and isolated environment as detailed in the Disaster Recovery and Business Continuity document, unless agreed otherwise in writing by the Parties).</li> <li>• Participate in chargeable Disaster Recovery simulations with the Partner on compute resources (if any) that form part of the Supported Item if requested by the Partner. This is subject to a minimum of five (5) Working Days' notice provided to the Service Desk by the Partner.</li> <li>• Coordinate with the Partner's representatives to execute DR processes in line with the Partner's IT Disaster Recovery and Business Continuity Plan, at the Partner's request. Exponential-e is responsible for carrying out all activities agreed for completion by Exponential-e in the Partner's IT Disaster Recovery and Business Continuity Plan.</li> <li>• Participate with the Partner on an annual basis to review and improve the Disaster Recovery and Business Continuity document.</li> </ul> |
| Documentation                             | <ul style="list-style-type: none"> <li>• Maintain solution design documentation for Supported Items in the CMDB.</li> </ul>  |

| Aspect  | Exponential-e's Responsibilities   |
|---|--|
|   | <ul style="list-style-type: none"> <li>• Maintain solution configuration documentation for Supported Items in the CMDB.</li> <li>• Maintain solution testing documentation for Supported Items in the CMDB.</li> <li>• Ensure that the CMDB includes the day-to-day operational procedures for the User OS &amp; Application Managed Enhanced Operational Support Level.</li> <li>• Produce and maintain a document detailing the configuration of the standard OS images available from Exponential-e's VDC and private cloud environments.</li> <li>• Implement and maintain version control for all above documentation.</li> </ul>   |
| End of Life Management  | <ul style="list-style-type: none"> <li>• Advise the Partner at least three (3) months in advance of upcoming End of Life dates of any compute resources (if any) that form part of the Supported Item.</li> <li>• If the Partner is not able to upgrade the OS or applications by the End of Life date, Exponential-e will use reasonable endeavours to continue to deliver the User OS &amp; Application Managed Enhanced Operational Management Level in accordance with this Schedule D however the Flex Manage service level agreement shall not apply to any compute resources (if any) that form part of the Supported Item Operating System, applications, or hardware that have reached their End of Life date.</li> </ul>   |
| Installations, Moves, Additions, Changes, & Deletions "IMACD" | <ul style="list-style-type: none"> <li>• Carry out installations, moves, additions, changes, deletions for all User equipment and workstations in line with the Change Management Process.</li> <li>• Ensure all devices requiring disposal are securely wiped prior to disposal.</li> <li>• Ensure disposal complies with reasonable Partner and WEEE policies.</li> <li>• Update IMACD documentation accordingly to incorporate IMACD operations and changes to ensure all specifications are current and version controlled.</li> </ul>   |
| Licensing   | <ul style="list-style-type: none"> <li>• Exponential-e is responsible for licensing management under the Contract to cover:</li> <li>• Application agents for AV as applicable for the compute resources (if any) that form part of the Supported Item.</li> <li>• Application agents for backup as applicable for the compute resources (if any) that form part of the Supported Item.</li> <li>• License management to ensure the compute resources (if any) that form part of the Supported Item have OS and application licenses and utilisation CALs/SALs.</li> <li>• RMM monitoring agents as applicable for the compute resources (if any) that form part of the Supported Item.</li> <li>• For the avoidance of doubt, this covers management of licences, not the provision of those licences.</li> </ul> |
| Monitoring  | <ul style="list-style-type: none"> <li>• All compute resources (if any) that form part of Workstation Supported Item will be configured with an RMM method that will be used to proactively monitor the health and availability of the Workstation Supported Items.</li> <li>• Configuring and maintaining standard, automated OS and application monitors for compute resources (if any) that form part of Workstation Supported Items to notify Exponential-e of OS and application issues and outages.</li> <li>• Document all monitoring settings for all compute resources (if any) that form part of Workstation Supported Items during the On Boarding activity and make this information visible to the Partner in the CMDB. Update the documentation when monitoring changes are made.</li> </ul>         |

| Aspect   | Exponential-e's Responsibilities   |
|--|--|
|  | <ul style="list-style-type: none"> <li>• Proactive monitoring of CPU, RAM, disk space, and network utilisation of Workstation Supported Items if access to this information is provided by the Supported Item and storing this information for thirty (30) days.</li> <li>• Proactive monitoring of all compute resources (if any) that form part of Workstation Supported Items at regular intervals (as agreed during On Boarding) to collect standard OS and application metrics.</li> <li>• Carrying out Exponential-e standard automated health check and performance monitoring for compute resources (if any) that form part of Workstation Supported Item Operating Systems and applications.</li> <li>• The Partner may choose up to five (5) additional OS monitors from Exponential-e's list of available additional OS and application monitors that Exponential-e will monitor for compute resources (if any) that form part of Workstation Supported Items.</li> <li>• Logging issues uncovered by OS and application monitoring within the management platform.</li> <li>• Process issues uncovered by OS and application monitoring to remediation (where possible).</li> <li>• Management and maintenance of the monitoring agent software.</li> </ul>  |
| <p>Operating System and Application Minor Upgrades</p> | <ul style="list-style-type: none"> <li>• Minor upgrades include all updates to the OS of compute resources (if any) that form part of the Supported Item that can be performed on the existing system. These upgrades do not require the existing supported OS environment or the applications running on it to be rebuilt to perform the upgrades. The following upgrades are included alongside the OS-level minor upgrades:                         <ul style="list-style-type: none"> <li>• Hardware firmware upgrades</li> <li>• All OS RMM agent upgrades</li> <li>• All backup software agent upgrades</li> <li>• All anti-virus software agent upgrades</li> </ul> </li> <li>• Minor Upgrades are included within the User OS &amp; Application Managed Enhanced Operational Management Level.</li> <li>• Major Upgrades (including all updates to the OS, applications, or other parts of the compute resources (if any) that form part of the Supported Item that require a new physical or virtual OS to be built) are not included with the User OS &amp; Application Managed Enhanced Operational Management Level and if required, will be undertaken by Exponential-e subject to additional Charges.</li> <li>• All upgrades to compute resources (if any) that form part of the Supported Item will be subject to the change management process, and the Partner will be required to approve all upgrade changes before the Service Desk will carry them out.</li> </ul> |
| <p>Patch Management</p>                                | <ul style="list-style-type: none"> <li>• Provide a list of critical, security, and non-critical OS and application updates (as identified by Exponential-e's third party patching solution) to the Partner on a monthly basis, at least five (5) days prior to the scheduled installation date. The Partner must confirm to Exponential-e in writing which of the identified critical and security updates are to be installed during the next patching event onto compute resources (if any) that form part of the Supported Item.</li> <li>• Install Partner approved critical and security OS and application updates onto compute resources (if any) that form part of the Supported Item on a monthly schedule.</li> </ul>  |

| Aspect | Exponential-e's Responsibilities  |
|--------|---|
|        | <ul style="list-style-type: none"> <li>• Install Partner approved non-critical OS and application updates onto compute resources (if any) that form part of the Supported Item on a monthly schedule, or less frequently (as agreed by the Parties during the Supported Item On Boarding process).</li> <li>• Provide a list of critical and performance updates for compute resources (if any) that form part of the Supported Item to the Partner on a quarterly basis, at least five (5) days prior to the scheduled installation date. The Partner must confirm to Exponential-e in writing which of the identified critical and performance updates are to be installed during the next patching event to compute resources (if any) that form part of the Supported Item.</li> <li>• Install Partner approved critical and performance updates onto compute resources (if any) that form part of the Supported Item hardware on a quarterly schedule.</li> <li>• Provide a list of non-critical and firmware updates for compute resources (if any) that form part of the Supported Item to the Partner on a semi-annual basis, at least five (5) days prior to the scheduled installation date. The Partner must confirm to Exponential-e in writing which of the identified non-critical and firmware updates are to be installed during the next patching event to compute resources (if any) that form part of the Supported Item.</li> <li>• Install Partner approved non-critical and firmware updates onto compute resources (if any) that form part of the Supported Item hardware on a semi-annual schedule.</li> <li>• Install critical and performance updates onto compute resources (if any) that form part of the Supported Item on a quarterly schedule.</li> <li>• Install non-critical and firmware updates onto compute resources (if any) that form part of the Supported Item on a semi-annual schedule.</li> <li>• Notify the Partner of proposed OS, application, and hardware updates to the compute resources (if any) that form part of the Supported Item at least three (3) Working Days prior to the scheduled update.</li> <li>• Configure all compute resources (if any) that form part of the Supported Item for automated update installation by the Service Desk. Compute resources (if any) that form part of the Supported Item that are not compatible with the Exponential-e automated update process will be updated manually.</li> <li>• Invoke the Emergency Patch Procedure when updates are identified by the vendor, Partner or Exponential-e as urgent. This procedure is a variation of the Standard Patch Procedure and aims to expedite the installation of the OS and application update for the compute resources (if any) that form part of the Supported Item. This procedure is documented in the CMDB.</li> <li>• Create the Standard Patch Procedure and the Emergency Patch Procedure jointly with the Partner and document these procedures in the CMDB and schedule Patching in line with the Procedures.</li> <li>• Patch management excludes any item that would in Exponential-e's reasonable opinion cause significant impact to the existing compute resources (if any) that form part of the Supported Item. For example, a patch that may require a full rebuild of the compute resources (if any) that form part of the Supported Item. This will be a chargeable Professional Services engagement.</li> <li>• Patch Management excludes security hardening of the compute resources (if any) that form part of the Supported Item required by regulatory or compliance purposes. This will be a chargeable Professional Services engagement.</li> </ul> |

| Aspect                           | Exponential-e's Responsibilities   |
|----------------------------------|--|
| Performance Testing              | <ul style="list-style-type: none"> <li>• Perform OS, application, and service testing on compute resources (if any) that form part of the Supported Item on request from the Partner as required in response to a perceived performance issue.</li> <li>• Confirm OS &amp; application testing prior to entry into Early Life Support.</li> <li>• Prepare and execute load simulations against managed application environments in response to a perceived performance issue.</li> <li>• Provide the Partner with reports from these load simulations.</li> <li>• Analyse application behaviour during load simulations to help isolate performance bottlenecks.</li> <li>• Recommend configuration changes to reduce bottlenecks as required in response to a perceived performance issue against the OS or applications.</li> </ul>  |
| Reporting                        | <ul style="list-style-type: none"> <li>• Delivering the following performance and management reports for servers covering a thirty (30) day period: <ul style="list-style-type: none"> <li>• Performance Review</li> <li>• Computer Audit</li> <li>• Patch Compliance</li> <li>• Anti-virus Health</li> <li>• Software List</li> </ul> </li> </ul>   |
| Service Desk                     | <ul style="list-style-type: none"> <li>• Provide a Service Desk service to Users and Users' equipment.</li> <li>• Categorise request priority according to the priority levels set out in the main body of this Service Document.</li> <li>• Respond to requests from the Partner based on the priority of the request according to the priority levels set out in the main body of this Service Document.</li> <li>• Escalate requests from the Partner by one priority level when requested by the Partner to do so.</li> <li>• Measure performance of the Service Desk in real time.</li> <li>• Act as the single point of contact for all incidents and service requests.</li> <li>• Manage all engagements with other vendor service desks and third party suppliers.</li> <li>• Maintain knowledgebase for incident/problem fixes.</li> <li>• Maintain a consolidated Forward Schedule of Change.</li> </ul> |
| Standard Installation Activities | <ul style="list-style-type: none"> <li>• Installation of Exponential-e RMM agents on compute resources (if any) that form part of Workstation Supported Items.</li> <li>• Configuration of Exponential-e standard monitoring on compute resources (if any) that form part of Workstation Supported Item.</li> </ul>  |
| Standard Operational Activities  | <ul style="list-style-type: none"> <li>• Configuration of remote access to the OS and applications. SSH is configured for Linux, and ScreenConnect is configured for Windows systems.</li> <li>• Configuration of management accounts for Exponential-e engineering staff.</li> <li>• Server reboots when required to keep OS and application functionality working, and when required by the Partner.</li> <li>• Service restarts for OS and application services.</li> <li>• Clearing temporary files and logs to release available OS and application space.</li> <li>• Identification of high risk OS and application issues.</li> <li>• Monitoring and delivering monthly Partner reports on the Flex Manage service level agreement.</li> </ul>  |
| User                             | <ul style="list-style-type: none"> <li>• Support requests and incident management, escalation and resolution.</li> <li>• Full lifecycle management of Users, including IMACD.</li> </ul>   |

| Aspect      | Exponential-e's Responsibilities  |
|-------------|---|
|             | <ul style="list-style-type: none"> <li>• Reset User account passwords upon approved requests.</li> <li>• Configure approved Access Management for User accounts to information and applications.</li> <li>• Assist Users to log on to their Workstations.</li> <li>• Assist Users to connect to printers.</li> <li>• Assist Users to remotely connect to the compute resources (if any) that form part of Workstation Supported Items.</li> <li>• Assist Users with access of their Office 365 accounts.</li> <li>• Assist Users with user utilisation activities of Office 365 components.</li> <li>• Carry out annual Continual Service Improvement to identify Partner improvements needed to manage Users and improve the effectiveness of User service delivery.</li> </ul>  |
| VIP List    | <ul style="list-style-type: none"> <li>• Maintain a VIP list for the End User's Users for whom service and support should be prioritised, above those of other Users.</li> <li>• Prioritise service and support for Users on the VIP list above those of other Users.</li> </ul>  |
| Workstation | <ul style="list-style-type: none"> <li>• Support Workstation requests and incident management, escalation and resolution.</li> <li>• Full lifecycle management of supported desktop and laptop devices (not including purchase or disposal, building, and IMACD), and making recommendations for its replacement throughout the Contract term.</li> <li>• Carry out semi-annual maintenance on Windows 10 Workstation images, including applications.</li> <li>• Carry out minor application upgrades on compute resources (if any) that form part of Workstation Supported Item.</li> <li>• Managing User access to compute resources (if any) that form part of the Workstation Supported Item.</li> <li>• Protecting removable hardware from loss using BitLocker encryption.</li> <li>• Carry out annual Continual Service Improvement to identify Partner improvements needed to manage Workstations and improve the effectiveness of Workstation service delivery.</li> </ul> |

**Support Ticket Allocation**

With effect from when the first tranche of Users enter the BAU phase the User OS & Application Managed Enhanced Operational Management Level includes a total number of support tickets opened per calendar month, as set out on the Order Form. If this threshold is exceeded for three (3) consecutive months or three (3) months in any rolling period of 6 months ("the Peak Threshold Period"), then Exponential e will produce a report analysing the drivers of the calls in the Peak Threshold Period and agree a Remediation Plan which will be executed by Exponential-e over a two (2) month period (for example further training on portal, capacity review, new project roll out, outage issues or similar). For the avoidance of doubt, no credits or refunds will be provided should this number not be required in any month.

**Partner Pre-requisite Requirements**

To start User Enhanced Operational Management of a Supported Item, Exponential-e requires the following pre-requisites to be fulfilled by the Partner during the On Boarding period:

- Provision of an OS license for the compute resources (if any) that form part of the Supported Item if this is not provided by Exponential-e.
- Provision of an Application license for the compute resources (if any) that form part of the Supported Item if this is not provided by Exponential-e.

- Provision of an AV license for the compute resources (if any) that form part of the Supported Item if this is not provided by Exponential-e.
- Provision of a Backup license for the compute resources (if any) that form part of the Supported Item if this is not provided by Exponential-e.
- Conducting the On Boarding activities (as identified by Exponential-e during the On Boarding process) including provision of information needed by Exponential-e to correctly manage and support the Supported Items.
- Provision of design documentation for currently running Supported Items, where this exists.
- Provision of Configuration documents or CMDB information for currently running Supported Items where it exists.

### Partner Dependencies

For Exponential-e to deliver the User OS & Application Managed Enhanced Operational Management Level, the following Partner dependencies exist. Failure of the Partner to meet these Partner Dependencies may affect the service Exponential-e is able to deliver to the Partner, and Exponential-e's obligations under the Flex Manage service level agreement.

- The Partner shall provide (or shall procure that the End User provides) documented naming conventions for all Supported Items.
- The Partner shall provide (or shall procure that the End User provides) documented active Partner IT policies for all Supported Items at the time of starting the On Boarding process.
- The Partner shall provide (or shall procure that the End User provides) Exponential-e with advice in advance of any peculiar, special, or particular modifications made to the Supported Item. This includes advice on the Exponential-e OS base level configuration as well as Exponential-e's standard User OS & Application Managed practices.
- The Partner shall be (or shall procure that the End User shall be) responsible for documenting and maintaining any differing configuration and build requirements pertaining to the existing OS and application environment that is peculiar, special, or has had particular modifications applied.
- The Partner shall provide (or shall procure that the End User shall provide), in accordance with the timelines defined during the On Boarding activity, approval for patching events, the approved list of updates to be installed, and approved list of firmware to be installed on physical Supported Items.
- The Partner shall undertake (or shall procure that the End User shall undertake) application and pre-deployment compatibility testing before authorising Exponential-e to deploy recommended patches to Supported Items.
- The Partner shall review (or shall procure that the End User shall review) the compatibility of all custom and non-standard applications or line of business applications with the OS and service packs to be used.
- The Partner shall ensure (or shall procure that the End User shall ensure) that the End User endpoints and management environments are secured, patched, and maintained in accordance with Good Industry Practice.
- The Partner shall ensure (or shall procure that the End User shall ensure) that the End User applications layered on top of the OS are secured, patched, and maintained in accordance with Good Industry Practice for Supported Items that exists prior to the On Boarding activity.
- The Partner shall assess (or shall procure that the End User shall assess) in advance the application suitability for virtualisation of the End User applications and for use with the hypervisor used for VMs.
- The Partner shall work (or shall procure that the End User shall work) with Exponential-e to replace all End of Life compute resources (if any) that form part of the Supported Item before the arrival of the End of Life date.
- The Partner shall review (or shall procure that the End User shall review) the compatibility and suitability of the selected compute resources (if any) that form part of the Supported Item configuration for its intended application usage.
- The Partner shall provide (or shall procure that the End User provides) Exponential-e with administrative rights on the Supported Items in order to provide the User OS & Application Managed Enhanced Operational Management Level on Supported Items.

- The Partner shall be responsible for all compute resources (if any) that form part of the Supported Item being protected by AV software. Compute resources (if any) that form part of the Supported Item not deployed with AV software are not covered by the User OS & Application Managed Enhanced Operational Management Level for virus infections free of charge.
- The Partner shall be responsible for all compute resources (if any) that form part of the Supported Item being protected by backup software. Compute resources (if any) that form part of the Supported Item not deployed with backup software are not covered by the User Operational Management Level for rebuild by Exponential-e free of charge.

### Service Education

Exponential-e will provide education to Partner staff about the details of the service provided, and how to make use of the User OS & Application Managed Enhanced Operational Management Level. Exponential-e will provide the following service education.

| Education  | Timeline              | Method                        |
|--|-----------------------|-------------------------------|
| Raising incidents for faults/issues  | On Boarding           | Face-to-face<br>CMDB document |
| Raising changes for system changes   | On Boarding           | Face-to-face<br>CMDB document |
| Reporting  | On Boarding           | Face-to-face<br>CMDB document |
| Requesting the creation of new Supported Items   | On Boarding           | Face-to-face<br>CMDB document |
| Requesting the addition of compute resources (if any) that form part of the Supported Item | On Boarding           | Face-to-face<br>CMDB document |
| Disaster Recovery and Business Continuity design and process                               | On Boarding           | Face-to-face<br>CMDB document |
| Solution design documentation for Supported Items  | First 3 months of BAU | CMDB document                 |
| Solution configuration documentation for Supported Items                                   | First 3 months of BAU | CMDB document                 |
| Solution testing documentation for Supported Items   | First 3 months of BAU | CMDB document                 |

### Accountabilities and Responsibilities

#### RACI

A responsibility assignment (RACI) matrix showing whether Exponential-e, the Partner or any relevant third parties are Responsible, Accountable, Consulted or Informed in respect of a particular aspect will be drawn up to ensure a joint understanding. The RACI is bespoke to the Partner, is formalised during the On Boarding phase, and is documented in the CMDB.

The following table details who is responsible for high level ITIL-level RACI activities for the User OS & Application Managed Enhanced Operational Management Level. Some activities are shared between Exponential-e and the Partner; where the Partner will be responsible for activities such as raising or approving change requests. Specific details are documented within the CMDB.

| ITIL Process             | Exponential-e | Partner |
|--------------------------|---------------|---------|
| Asset Management         | RA            | CI      |

The Partner is responsible for all RACI activities for areas that Exponential-e is not responsible for. During the On Boarding activity the Partner shall identify key internal and 3rd line primary and back-up contacts to the Service Desk and promptly inform the Service Desk of any changes during the term of the Contract.

### Service Requests

Service Requests are requested changes to a Supported Item or a request for an operational task made by the Partner.

Types of Service Requests may include those set out in the table on the following pages.

Where a Quantity and Frequency are specified in the table on the following pages, this is a maximum allowance included free of additional Charges over the corresponding timeframe. Service Requests in excess of this allowance will be accepted by Exponential-e but shall be invoiceable in arrears in accordance with Exponential-e's then-current Professional Services rates. For the avoidance of doubt, allowances apply on a "use it or lose it" basis and unused portions of any allowance cannot be rolled-over or the subject of any credit. Where the Quantity is designated as N/A, there is no maximum allowance and no additional charges shall apply.

All Service Requests that are designated in the table on the following pages as PR and any other Service Requests of a type not listed in the table are not included within the Charges for the Flex Manage Service and will be invoiceable in arrears in accordance with Exponential-e's then-current Professional Services rates plus any additional charges that apply as agreed in writing at the time of Service Request acceptance.

All Service Requests will be reviewed, verified and subject to approval by Exponential-e and Exponential-e will confirm if additional charges apply.

Service Requests will be subject to the applicable Target Time to Complete (if any) set out in the table on the following pages. Exponential-e shall use reasonable endeavours to complete the Service Request within this timeframe. The Partner may request the delivery time for all Service Requests to be scheduled for a future date/time in which event, the Target Time to Complete will commence at the relevant date/time.

Service Requests will be carried out by Exponential-e during the Hours stated in the table on the following pages. Should the Partner request that they be carried out outside of the applicable Hours, additional charges in accordance with Exponential-e's then-current Professional Services rates will apply.

| ID       | Request Description  | Availability |       | Type * | Hours                 | Time to Complete                           | Quantity | Frequency     |
|----------|--|--------------|-------|--------|-----------------------|--|----------|---------------|
|          |  | Email        | Phone |        |                       |  |          |               |
| SRUA M01 | Shut down OS   | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 hour                                     | 10       | Per month     |
| SRUA M02 | Reboot OS  | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 hour                                     | 10       | Per month     |
| SRUA M03 | Request new physical workstation   | Yes          | Yes   | PR     | Normal Business Hours | 7 Working Days following hardware delivery | N/A      | As required   |
| SRUA M04 | Change IP address  | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day                              | 1        | Per quarter   |
| SRUA M05 | Change hostname  | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day                              | 1        | Per quarter   |
| SRUA M06 | Complete emergency patching  | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day                              | 1        | Per quarter   |
| SRUA M07 | Complete emergency AV scanning   | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day                              | 1        | Per quarter   |
| SRUA M08 | Adjust the physical resources allocated to the workstation upon Partner request                                      | Yes          | Yes   | PR     | Normal Business Hours | 2 Working Days following hardware delivery | N/A      | As required   |
| SRUA M09 | Create and format physical disk volumes  | Yes          | Yes   | PR     | Normal Business Hours | 2 Working Days following hardware delivery | N/A      | As required   |
| SRUA M10 | Complete one-time performance trend analysis of workstation environments (CPU, RAM, disk space, network utilisation) | Yes          | Yes   | OSR    | 24 x 7 x 365          | 2 Working Days                             | 1        | Semi annually |
| SRUA M11 | Review DR and BC plan  | Yes          | Yes   | OSR    | Normal Business Hours | 5 Working Days                             | 1        | Per annum     |
| SRUA M12 | OS and application patch installation  | Yes          | Yes   | OSR    | 24 x 7 x 365          | 8 hours                                    | 1        | Per month     |
| SRUA M13 | Hardware firmware installation   | Yes          | Yes   | OSR    | 24 x 7 x 365          | 2 hours                                    | 1        | Semi annually |

| ID       | Request Description  | Availability |       | Type * | Hours                 | Time to Complete | Quantity | Frequency   |
|----------|--|--------------|-------|--------|-----------------------|------------------|----------|-------------|
|          |  | Email        | Phone |        |                       |                  |          |             |
| SRUA M14 | Reset workstation management account password                                  | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 hour           | 1        | Per quarter |
| SRUA M15 | Review OS and application audit logs   | Yes          | Yes   | OSR    | 24 x 7 x 365          | 2 Working Days   | 1        | Per annum   |
| SRUA M16 | Fail over the virtual workstation to another location                          | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 hour           | 1        | Per month   |
| SRUA M17 | Request new virtual workstation  | Yes          | Yes   | PR     | Normal Business Hours | 1 Working Day    | N/A      | As required |
| SRUA M18 | Complete additional backups of the workstation                                 | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day    | 5        | Per quarter |
| SRUA M19 | Restore the full physical workstation from backup                              | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day    | 1        | Per annum   |
| SRUA M20 | Restore the full virtual workstation from backup                               | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day    | 1        | Per annum   |
| SRUA M21 | Restore individual files from backup   | Yes          | Yes   | OSR    | 24 x 7 x 365          | 2 hours          | 60       | Per annum   |
| SRUA M22 | Test restore files from backup to test backup validity                         | Yes          | Yes   | PR     | Normal Business Hours | 2 Working Days   | N/A      | As required |
| SRUA M23 | Adjust the virtual resources allocated to the workstation upon Partner request | Yes          | Yes   | OSR    | 24 x 7 x 365          | 1 Working Day    | 1        | Per month   |

\* PR = Project Requirement, OSR = Operational Support Request

### Data Processing

When Exponential-e provides the Enhanced Operational Management Level – User OS & Application Managed, this may result in Exponential-e Processing Partner Personal Data. The following applies to the Processing of such Personal Data by Exponential-e:

#### Subject Matter of Processing

The Personal Data (if any) that the Partner / End User stores within the applications managed by Exponential-e or the End User's Active Directory.

#### Nature of the Processing

As reasonably required to provide the User OS & Application Managed Enhanced Operational Support Level in respect of the managed application.

Exponential-e will not block, delete, correct, pseudonymise or encrypt any data. Exponential-e has no responsibility for data accuracy in respect of the Partner/End User data within the managed application.

Appropriate Technical and Organisational Measures

With respect to the requirement set out in the General Terms in Clause 10.15 at point (ii), the Partner agrees that as far as it is concerned the security measures set out in the Contract and Exponential-e's maintenance of the ISO27001 (Information Security Management) standard (or any replacement or equivalent subsisting from time to time) (collectively the "Security Measures") fulfils the requirement of appropriate technical and organisational measures and the Partner agrees not to contend otherwise, recognising that the Charges for the Flex Manage directly relate to the Security Measures to be applied.
