

Collaboration Space

Enable seamless communication and collaboration through interconnected meeting spaces.

Collaboration Space empowers meeting spaces with audio and visual capabilities through software and hardware, facilitating seamless internal and external collaborative experiences for businesses. The solution encompasses a diverse range of Microsoft Teams and Android certified devices, guaranteeing superior audio and video quality. These certified room kits and conferencing endpoints are designed to cater to flexible workplaces that ultimately enhance the end customer's ability to foster productive interactions.

CHALLENGES

- **Connecting dispersed workforces** - Your customers may find it difficult to enable easy collaboration between in-room and remote employees during meetings.
- **Budget constraints** - Your customers may have a limited budget to buy high quality meeting room devices.
- **Finding the right solution** - With many vendors selling similar meeting room devices, this makes it difficult for your customers to choose the right solution for their business needs.
- **A lack of trained IT staff at your customer's organisation** - limits their ability to effectively troubleshoot issues related to meeting room devices and peripherals.

SOLUTION OVERVIEW

A typical Collaboration Space service will consist of one or more of the following meeting spaces:

Meeting Space	Capacity
Huddle Space / Small Meeting Room	2 - 6 participants
Medium Meeting Room	6 - 10 participants
Large Meeting Room	12+ participants

FEATURES & BENEFITS

- **User-friendly devices** - Businesses can minimise the learning curve for new users with intuitive interfaces and touchscreen controls, ensuring smooth and efficient meeting operations.
- **Seamless Integration** - Collaboration Space devices are designed to seamlessly integrate with popular communication and collaboration platforms, such as O365, SharePoint, OneDrive, and other office apps, enhancing the user experience.
- **Wireless content sharing** - Collaboration Space room kit devices make sharing presentations, documents, and screens during meetings easy. Also, users can share content wirelessly or wired, to enhance business collaboration and productivity.
- **Superior audio and visual quality** - Our meeting room solutions provide superior audio and visual quality, providing crystal-clear audio and high-definition video to ensure effective communication during meetings.
- **Scalability** - Businesses can select versatile options for different room sizes, adapting to their evolving business needs.
- **Better-connected teams** - Businesses can conduct meetings seamlessly and inclusively, ensuring that teams and users are both seen and heard, while also enhancing productivity.
- **Range of options** - The solution offers a diverse range of meeting room devices to suit various room sizes and needs, from small huddle spaces to large conference rooms, providing flexibility for businesses of all sizes.
- **Security** - Collaboration Space prioritises security, with built-in robust features to safeguard businesses data and communications.
- **BYOD meeting kit** - For your small and huddle rooms ensures an excellent video and audio experience with lower cost, optimising the user experience via one cable. This meeting kit is not only plug-and-play, but enables all kinds of UC meetings, including Teams, Zoom, Slack etc.
